GENERAL

- Band: 5 persons + usually 2 crew. Arrival normally by own cars; please provide safe nearby parking.
- Set length: 45 minutes. Required setup: 15 minutes. Required teardown: 10 minutes.

STAGE

- Minimum stage size: 6 m x 4 m (W x D). Stable and safe stage required.
- Please provide suitable mounting for the backdrop.
- Stage rack is positioned right of the drum kit (drummer view).
- For the IEM system, FOH provides an XLR stereo monitor signal from the miked drum kit.
- DOGTAK brings a multicore for split signals from the IEM rack to the local stagebox.
- Backline is fully digital; no cabinets are required on stage.
- Power quantity and positions: see stage plot.

MONITORING

- DOGTAK travels with its own in-ear monitoring system. No stage wedges are required.

TECHNICAL DETAILS

MICROPHONES / CABLING / STANDS

- Vocalist uses his own microphone.
- All power feeds, drum microphones and stands must be provided locally.
- All signals except drums leave the DOGTAK stage rack via multicore to the local stagebox.

LIGHT

- If no fog is available locally, DOGTAK uses its own fog machine on stage.
- Each musician is lit by 2 DOGTAK DMX spots programmed to the show.
- Venue provides a local technician to operate the house lighting in addition to the programmed show.

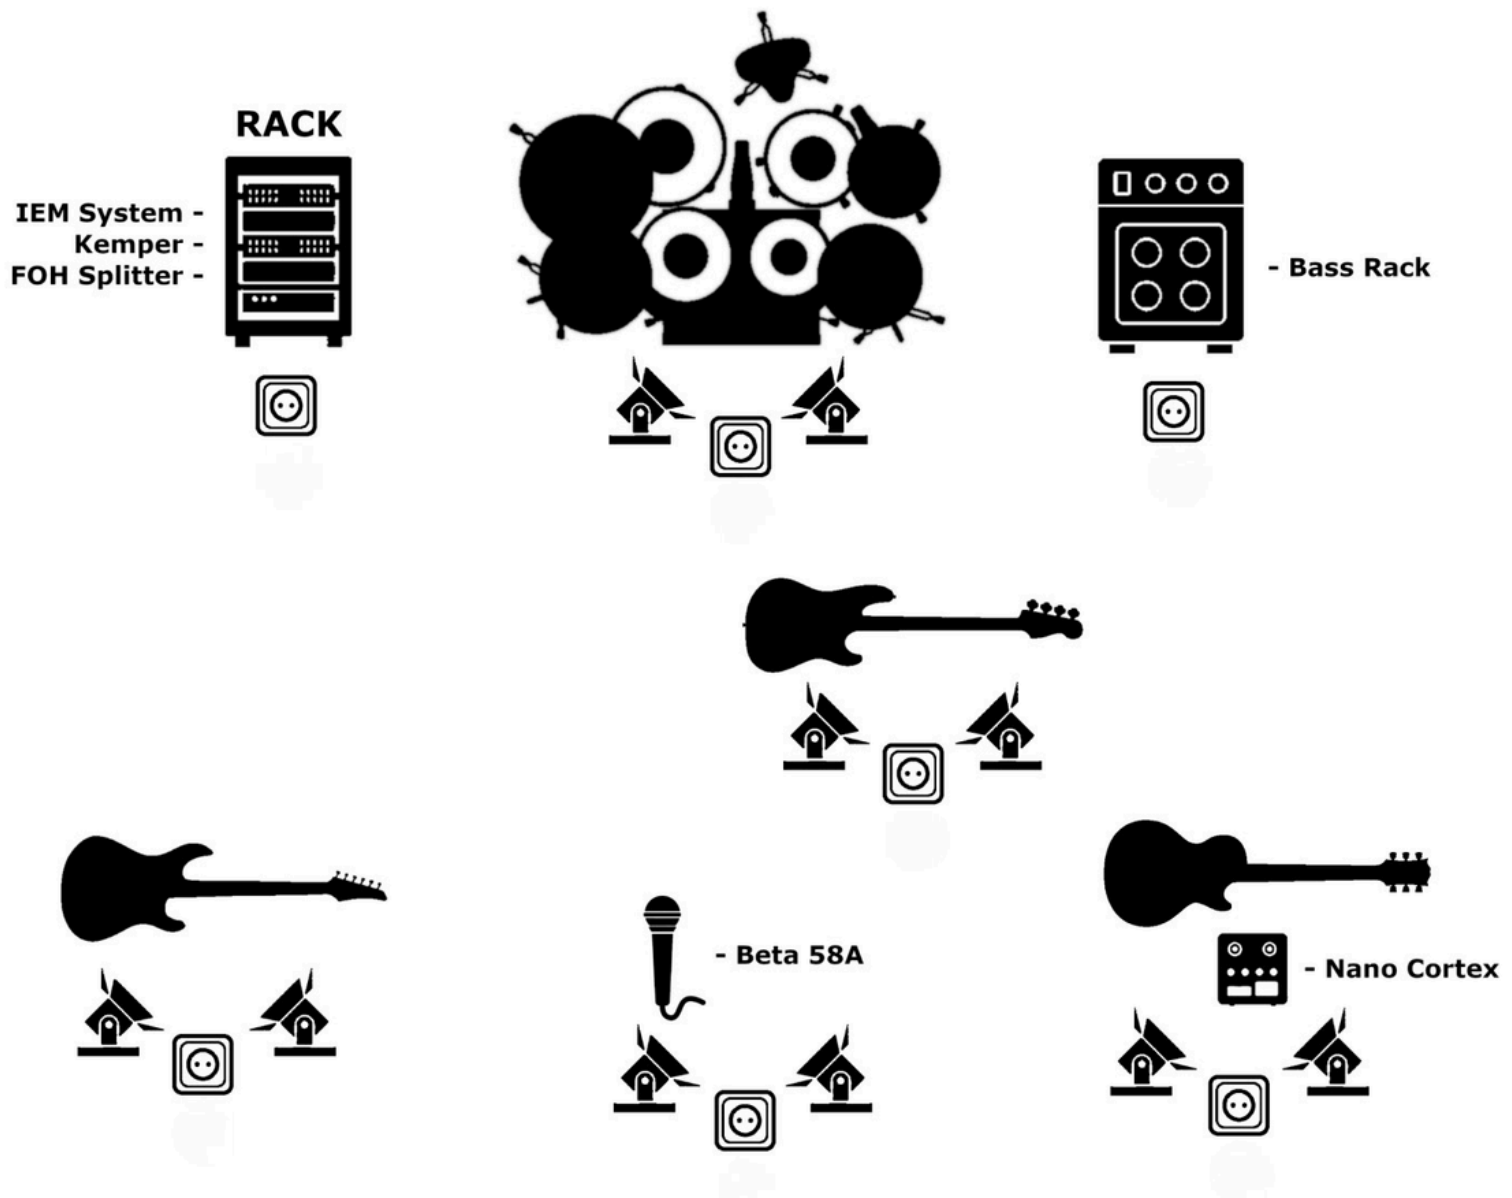

CATERING

- No known allergies, vegetarians or vegans in band/crew. Please coordinate food and drinks with the band contact in advance.
